

box of 30 daily contact lenses

DayVue 58 BIO

AUGMENTED BIOCOMPATIBILITY

The materials that contain glycol methacrylate showed an improvement of internal water retention with a low percentage of dehydration and a high rate of rehydration. Moreover, this material is particularly resistant to surface deposits and insensitive to pH variations. This polymer is made up by free radicals of hydrogen that naturally attract water molecules ensuring longer and more wettability and lens lubrication.

HIGH DEFINITION SYSTEM

Differently from other aspheric lenses in the market, the high definition design of this lens combines the ideal aspheric curving for each power with the lens thickness and compensates for the visual aberration caused by the lens flexure on the eye surface. This means a better visual acuity from all distances, a larger depth of field and a reduction of refractive astigmatism, improving the contrast sensitivity and giving a sharper and clearer vision.

Advantages

- ✦ Generic white box with private label sticker
- ✦ Available in stock
- ✦ No MOQ required
- ✦ Reduction of effects caused by dry eye symptoms
- ✦ Aspherical geometry with visual aberration control
- ✦ Exceptional comfort and perfect fitting
- ✦ Higher visual acuity and enhanced contrast sensitivity
- ✦ Lenses immersed in a buffer saline solution with hyaluronic acid with wetting and lubricating properties, especially during the first hours of wear

Technical file

Material	Hioxifilcon (Hema+GMMA) with UV filter
Water content	58%
Geometry	Aspheric
Base curve	8,60 mm
Diameter	14,20 mm
Central thickness	0,092 mm (at -3,00 Dt)
Handling tint	Blue
Power range	-12.00 Dt +6.00 Dt -12.00 to -6.50 (0.50 step) -6.00 to +6.00 (0.25 step)
