

box of 30 daily contact lenses

# DayVue 58<sup>AC</sup>

extremely highly performing daily contact lens

The material of DayVue 58<sup>AC</sup> contact lenses is one of the most fail-safe and biocompatible in the market. The special aspheric geometry of this lens allows aberration control and improves visual acuity. In addition, the lens comfort and safety is guaranteed by the special edge design, by the average water content and by the presence of UV protection.

Each and every lens undergoes five controls during the production. As a result, DayVue 58<sup>AC</sup> is a lens extremely highly performing and pleasant to wear. The lens is immersed in buffer saline solution with hyaluronic acid increasing lubrication and comfort in the first hours of wear.

## Advantages

- ✦ Produced with aspheric geometry allowing aberration control
- ✦ Immersed in buffered saline solution with hyaluronic acid. This additional element, attracting more water, increases lubrication and improves comfort in the first hours of wear
- ✦ Each lens undergoes five steps of quality control during the manufacturing process and it's checked one by one (not by sampling)
- ✦ Hydrated in the tank and not in the blister pack, providing enhanced biocompatibility
- ✦ COS - Curve Orientation System: a computerized system able to ensure that the lens in the blister is always correctly oriented for the fitting

## Technical file

Material	Etafilcon A with UV absorber
Water content	58%
Diameter	14.2 mm
Base curve	8.5 mm
Geometry	Aspheric
Central thickness at -3.00 Dt	0.08 mm
Power range	<b>+4.00Dt ~ -12.00Dt</b> (from -0.50 to -6.00 and from +0.50 to +4.00 in 0.25 step; from -6.00 to -12.00 in 0.50 step)
