

360ml and 100ml bottle

# UnosoftHY

multipurpose  
solution with  
sodium hyaluronate

UnosoftHY is a multipurpose solution with sodium hyaluronate and protein removing agents, ideal for disinfecting, cleaning, storing and hydrating all soft clear and color contact lenses.

UnosoftHY formulation has an unique balance offering effective antibacterial action, superior comfort and long lasting hydration.

Storing contact lenses in saline solution with sodium hyaluronate helps to provide optimal fitting and extra comfort during the first hours of wear.

## Advantages

- + Proven safe, effective and economical for lens cleaning and disinfection
- + Keep the lens comfortable from the time of insertion till the end of the day
- + Contains buffers to maintain pH level and osmolarity as close in value as possible to those of the healthy tear film
- + Sodium hyaluronate keeps lenses lubricated and modify the lens surface to reduce its impact on the ocular environment when inserted and during the wear
- + 100% made in Italy
