

box of 6 monthly contact lenses

Vision Plus 55^{AC}

a superb level
of visual quality
for a successful lens

Vision Plus 55^{AC} lens is available since many years on the market with very good results in fitting and customer loyalty. The lens combines excellent material and special aspheric geometry for aberration control. Spheric lenses tend to reflect light more strongly at the edges than in the lens center, thus focusing light in different planes. This focusing error is known as "spheric aberration".

Vision Plus 55^{AC} monthly clear lenses correct both spheric aberrations and higher order aberrations of the human eye.

Advantages

- + Constant and long lasting presence on the market
- + Improved visual acuity, especially in moderate to high prescriptions
- + Enhanced contrast sensitivity
- + Astigmatism correction up to one diopter
- + Easy handling, superb comfort
- + Valuable choice for low astigmatism, early presbyopia and those who wish to improve their overall vision

Technical file

Material	Methafilcon A with UV absorber
Water content	55%
Diameter	14.2 mm
Base curve	8.6 mm
Geometry	Aspheric
Central thickness at -3.00Dt	0.08 mm
Power range	+10.00Dt ~ -20.00Dt (from +10.00 to +6.00 and from -6.00 to -20.00 in 0.50 step; from +6.00 to -6.00 in 0.25 step)
